

Mobile 3D Catalogue

Interactive product sales tool

3D PRODUCT VISUALISATION - PORTABLE - EASY-TO-USE - COST EFFICIENT

Benefits to your brand

- Replace physical products and demonstrate products on a tablet device from any angle, zoomed, and animated to simulate actual operation
- Start selling products from digital versions
- Speed up product development processes
- No time, space or location constrains
- Improve customer experience and satisfaction

Content

Upload your product CAD files via the portal after which we will finalise the visualisation. Digital assets (3D models, photos, videos, PDF files and web links) can be incorporated into the product demonstrations, allowing the reuse of existing content.

Cloud based

The catalogue is maintained via a cloud-based web portal, allowing you to upload your own content and manage your own branding.

Interface

The application is optimized for both iOS and Android platforms and the UI is designed to impress on all phones and tablets.

Metrics

An analytics dashboard is available via the web portal which allows powerful reporting based on user activity.

Stereoscape brings digital experiences to physical spaces by combining powerful 3D visualisation, smart interactivity and advanced digital display technologies to deliver customer experiences that differentiate brands and activate customers. More info @ www.stereoscape.com
