

What is WorkfloPlus?

Assisted Reality (aR) digital instructions & On-boarding for the industrial workforce.

Digitize

Transform paper-based processes into a digital workflow using the intuitive WorkfloPlus editor with drag and drop functionality.

Maintain control

Track and enable your workforce to perform their tasks by following simple and understandable step-by-step instructions.

Communicate

Distribute instructions to your workforce via any mobile device or smart glasses.

Analyse

Capture and analyse live data.

What are the main applications of WorkfloPlus?

WorkfloPlus is a suitable solution for different type of purposes.

Inventory check

Assembly

Inspection

Quality control

Maintenance

Operational procedures

Product testing

Health & safety

Incident report

Benefits

With WorkfloPlus, businesses have the ability to capture detailed data on how each and every process is carried out.

Increased productivity

Any documents or resource a worker might require is easily accessible.

Better way of collaborating with the team

WorkfloPlus allows to assign, track, transfer and reschedule one time or recurring jobs wherever you are.

Time saving

Operators can spend less time looking for paperwork and more time on repairs.

Reduce errors & improve efficiency

No more unexpected delays or searching through manuals, with the option to call for a support on demand.

Knowledge retention & sharing

Capture and share knowledge quicker and easier for training.

Device agnostic

Compatible with a large range of devices such as smart-glasses intrinsically safe devices, desktop, laptop, iOS and Android.

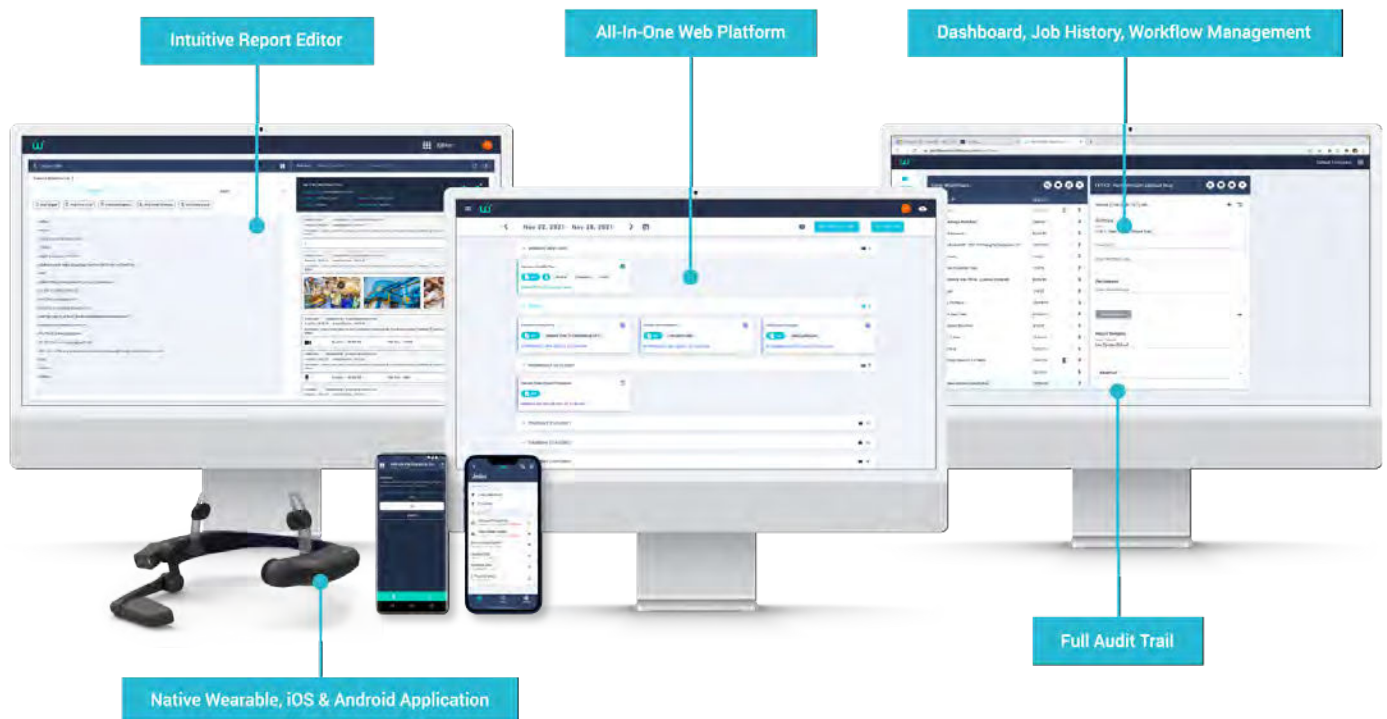

Custom Report Designer

Whether you want to replicate an existing paper-based report, create a job completion certificate, or summarise the most important parts of a job, the Report Designer's got you covered.

Highlights

WorkfloPlus is simple solution to complex problems.

Designed for the mobile workforce, it increases the speed of operations and improves the quality for all types of processes.

About Stereoscape

Stereoscape designs and builds 3D- and XR-powered solutions that enable people to experience information in entirely new ways — so that they can understand more, learn faster and work smarter.
